

BASHIR MOHAMED ALI

Software Development Manager | FinTech & Payments | .NET Microservices | Secure API Platforms

Saudi Arabia | +966507804458 | baryce@gmail.com | linkedin.com/in/bashirmali

PROFESSIONAL SUMMARY

Software development manager and technical delivery leader with 13+ years of software engineering experience across banking, payments, healthcare, and enterprise systems. Strong background in FinTech and digital banking delivery, secure REST APIs, API design, .NET/Blazor platforms, SQL Server, and cloud-native microservices architecture. Known for leading and mentoring developers, coordinating Agile delivery, improving performance and uptime, and translating business-critical financial workflows into reliable, secure, production-ready systems.

CORE LEADERSHIP & TECHNICAL STRENGTHS

Leadership & Delivery: team leadership, mentoring, Agile delivery, release planning, code reviews, vendor coordination, cross-functional coordination, technical documentation.

FinTech & Architecture: payment solutions, digital banking workflows, secure REST APIs, API governance, microservices architecture, event-driven services, OWASP-aware secure development.

Technology Stack: .NET 6/7/8, C#, ASP.NET Core, Blazor, EF Core, SQL Server, Docker, Kubernetes, OpenShift, Google Cloud, CI/CD, observability, Git, JWT, MFA, AES-256.

PROFESSIONAL EXPERIENCE

Software Development Manager / Senior Full Stack Software Engineer | Farmer's Commercial Bank, Sudan | Nov 2015 - Present

- Led design and delivery of .NET Core and Blazor applications supporting critical digital banking and financial operations.
- Designed and integrated secure REST APIs for banking systems, improving integration reliability and reducing data transfer errors by 40%.
- Delivered custom payment solutions that improved transaction processing time by 20% and strengthened operational responsiveness.
- Coordinated Agile delivery with business, infrastructure, QA, and support stakeholders to shorten release cycles by 25%.
- Mentored junior developers through code reviews, technical guidance, debugging support, and onboarding, improving team productivity by 10%.
- Implemented AES-256 encryption and MFA controls, reducing potential security vulnerabilities by 50% and supporting secure API development aligned with OWASP principles.
- Improved system performance by 30%, cut server costs by 20%, and enhanced uptime by 15% through optimization, proactive maintenance, and scalable architecture.
- Provided technical coordination with internal teams and external technology partners for banking platform changes, deployments, troubleshooting, and production support.

Key technologies: .NET 6/7/8, ASP.NET Core, Blazor, C#, REST APIs, SQL Server, EF Core, Docker, Kubernetes, CI/CD, Git, Microservices, Agile.

Cloud-Native Microservices Architecture Project | Personal Project | 2025 - Present

- Designed a production-style microservices architecture deployed on Kubernetes using MicroK8s, Docker, and clean architecture principles.
- Built Product, Coupon, Order, Shopping Cart, and Email services with ASP.NET Core, EF Core, SQL Server, JWT authentication, and centralized API communication.
- Implemented event-driven communication using RabbitMQ and MassTransit to support resilient service-to-service workflows.
- Configured Kubernetes Deployments, Services, ConfigMaps, Secrets, and Ingress to demonstrate scalable cloud-native deployment patterns.
- Aligned architecture with CI/CD readiness, API design discipline, SOLID principles, and maintainable service boundaries.

Tech stack: .NET 8, ASP.NET Core, RabbitMQ, MassTransit, Docker, Kubernetes, MicroK8s, REST APIs, JWT, EF Core, SQL Server.

Full Stack Software Engineer | 48 Modal Hospital, Yemen | Jun 2011 - Apr 2015

- Designed and developed hospital information systems that digitized operational workflows and improved data accuracy.
- Integrated modules with existing infrastructure and provided ongoing support, troubleshooting, and enhancements for reliable operations.

Technical Support Director | WonderTech Middle East, Yemen | May 2010 - May 2011

- Managed maintenance teams delivering surveillance and security technology solutions for client environments.
- Oversaw installation, integration, troubleshooting, and daily coordination for digital security systems.

EDUCATION

Bachelor of Computer Science - Hadhramout University of Science and Technology, Yemen | 2004 - 2008

CERTIFICATIONS & PROFESSIONAL TRAINING

- Certificate in Digital Money - Digital Frontiers Institute (DFI), August 2022
- Preparing for Google Cloud Certification: Cloud DevOps Engineer Professional Certificate - Google Cloud/Coursera, January 2026
- IBM DevOps, Cloud, and Agile Foundations Specialization - IBM/Coursera, September 2024
- Application Security for Developers and DevOps Professionals - IBM/Coursera, October 2024
- Modular Monolith Architecture: .NET 8, CQRS, API Development, and Module Communication - Packt/Coursera, February-March 2026
- Selected DevOps coursework: Kubernetes/OpenShift, CI/CD, Monitoring & Observability, Microservices & Serverless, TDD/BDD, Git/GitHub

SELECTED ACHIEVEMENTS

- Reduced transaction processing time by 20% through custom payment solution delivery.
- Reduced release time by 25% by improving CI/CD and Agile delivery practices.
- Strengthened data protection by 50% with AES-256 encryption and MFA controls.
- Reduced infrastructure costs by 20% and improved system performance by 30% through optimization.
